

GrandPrix™

The original.

It transformed the auto detailing industry and became the best-selling and most imitated detailing extractor in the world. Mytee's Grand Prix was the first heated extractor to feature a single power cord. Before this innovation, most heated extractors required two power cords, making it hard to find a power source. But this trailblazer changed all that, and the rest is history.

The HP100 offers maximum vacuum power with a 3 stage vacuum, letting you leave cars dryer. It also features Mytee's "Real Heat" heating technology, which delivers on demand hot water when you need it. The 12 gallon tanks allow you to complete more jobs between fill-ups, and the stainless steel detail tool will stand up to heavy use. The built in blower outlet can also be used with our HP-DRY kit for drying auto interiors (sold separately - see page 17).

See for yourself why this classic sets the standard that other auto detailing extractors are still trying to live up to.
