

Spyder™

It puts the "mobile" in mobile detailing.

With 6 gallon capacity tanks, the Spyder takes all of the power of a full size extractor, and packs it into a unit that can be stored and transported easily. This powerhouse unit will give you the same professional results as our 11 gallon units, but is about half the size.

This compact footprint makes it perfect for loading on and off trailers or vans for mobile detailing. It features a powerful 3 stage vacuum, 100 PSI pump, and in-line heater - allowing you professional, fast results wherever you go. The hoses and tools are professional grade for long life. The built in blower outlet can be used with our HP-DRY kit for drying auto interiors (sold seperately - see page 17).

Order your power to go. Try the Spyder today.
