**MYTEE® INTRODUCES CUFF-LYNX™
New product outperforms traditional vinyl hose cuffs**

Mytee Products, Inc. is excited to announce production and sale of a revolutionary new product – Cuff-Lynx™.

These cutting-edge vacuum hose connectors are a major improvement over traditional vinyl cuffs, which can lose suction and leak, and are hard to attach in cold weather. Cuff-Lynx™ are different.

Cuff-Lynx™ made of durable nylon, and feature a positive O-ring seal that prevents leaks and provides better suction. With our exclusive soft lock, they twist easily into place when joining hoses or attaching to an extractor. Reducer models let you attach a 1½” or 1¼” hose to a 2” vacuum port or other hose. Made of durable nylon, Cuff-Lynx™ resist cracking, despite low temperatures.

“We’re proud to offer Cuff-Lynx™ to our customers,” said Mytee® President John LaBarbera. “We know how hard they work. It’s just another way we work to make their jobs run more smoothly.”

Mytee Products, Inc. is located in Poway, Calif., just outside of San Diego. Founded by John LaBarbera, Mytee® manufactures and sells an extensive line of carpet cleaning, auto detailing and janitorial products to customers throughout the world. Visit our web site at www.mytee.com.
